

Welcome to the Power Lists 2014

Who are the 100 most influential people in ophthalmology?

That's the question we posed to ourselves - and then to you - over two months ago, ahead of open nominations and a painstaking judging process. Here, without further ado, we celebrate the answer.

Theo Seiler

Amar Agarwal

Chang

Ioannis Pallikaris

Ike Ahmed

Abhay Vasavada

A. John Kanellopoulos

Ambrósio

Rudy Nuijts

Dan Albert

Bruce Spivey

Marshall

Robert Nussenblatt

Claes Dohlman

Harminder Dua

Richard Abbott

David Abramson

Anthony Adamis

Eduardo Alfonso

A CXL expert, John Kanellopoulos developed the Athens protocol for keratoconus and ectasia, which combines laser normalization of the irregular cornea with cross-linking. He also introduced higher fluency cross-linking and prophylactic cross-linking with LASIK, a precursor to LASIK Xtra, and demonstrated how CXL helps in infectious keratitis, corneal melts and pseudophakic keratopathy.
