Innovations and Controversies in Corneal Cross-Linking

Subspecialty: Cornea/External Disease Refractive Mgmt/Intervention

Participant(s): A. John Kanellopoulos, MD

Source: ONE Editors' Choice

Epi-on or Epi-off? Should topography-guided PRK occur before or after cross-linking? How about intracorneal rings? Are surgeons cross-linking too much tissue? What exactly is keratoconus? Drs. A. John Kanellopoulos and Theo Seiler brought together world-wide experts to discuss these questions at an International Society of Refractive Surgery symposium during the 2010 Joint Meeting in Chicago. In today's interview, Dr. Kanellopoulos shares what he learned.
